

AUSTRALIAN HD
YOUTH ALLIANCE

We're puttin' on a one-day talkfest on HD (Huntington's Disease) for people 16+! This is for you if:

- You come from an HD family
- You're gene+ but not symptomatic, you're not tested or you tested negative
- You're a partner or a friend or a sister or a brother

It's in Melbourne, February 25th 9am-5pm followed by a casual dinner for those with stamina

A chance to hang out, learn stuff, ask a few questions if you want, or just meet a few people a bit like you. Please even bring someone with you if it makes it easier!

Supported by Dr Andrew Churchyard, Neurologist, Lisette Curnow, Genetic Counselor and Huntington's Victoria

Topics include testing, babies, partners and relationships, who do I have to tell about HD? And research amongst lots of others. We have locked in some awesome experts.

3 good reasons to come:
No PowerPoint presentations
Plenty of personal stories
A chance to meet people like... you!

Check out our website www.ourhdspace.org

RSVP is a must - to Tony 0434 015 089 or tonymims00@gmail.com by Feb 18

The day is free including lunch but drinks after and dinner will be at your cost (but it will be cheap). If you really want to come but may have trouble getting there because of finance issues, give us a call and we will try to work something out.
